

Building the Best Place for Kids

Le Bonheur Children's Hospital recently completed a four-floor expansion in Memphis, enhancing its critical care services. This expansion includes the addition of a new cardiovascular intensive care unit (CVICU), 14 new beds in the neonatal intensive care unit (NICU), and eight new beds in the post-anesthesia care unit (PACU), all now open. We're honored by this expansion's nomination for a Building Memphis Award, and we remain committed to making Le Bonheur the best place for kids.
